

Hi Samantha,

I've known Sarah Vansandt for over a year since she's worked on a number of projects for Kim Gavin. Within that period I've been impressed with Sarah's ability to communicate succinctly and graciously with people of all ages. She is proficient with many varying software languages, video editing, and app development.

Her first time to the symphony was an experience she speaks of often and passionately about, and one that she's successfully convinced others to try. For this, and the reasons above, I believe she'd be the kind of intern/employee who would represent the Chattanooga Symphony & Opera with the kind of passion, vision, and work ethic that would be an asset on many levels.

Thanks for considering,
Holly
